

MATH STUDY STRATEGIES

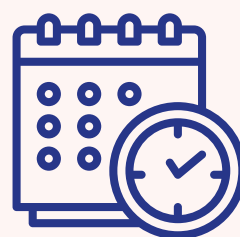

CLASS TIPS

1. Read before going to or logging on to class.
2. Attend all classes, whether virtual or in-person.
3. Sit near the front.
4. Take complete class notes.
5. Stay current on your reading and your homework.
6. Do all your homework.
7. Give yourself sufficient time to learn.

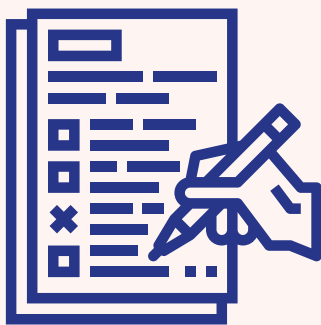

STUDY TIPS

①

1. Practice good sleep habits.
2. Learn the method of the problem and practice, practice, practice!
3. Work on math every day.
4. Complete homework without referring to the sample problems.
5. Use timed practice quizzes.
6. Ask “What does the problem want me to do?”
7. Allow yourself to make mistakes.
8. Explain the problem out loud.
9. “Teach” the method to someone else.

EXAM TIPS

1. Do a “memory dump” and write formulas on your test or scratch paper.
2. Look over the test.
3. Do the easiest questions first.
4. Show all your work.
5. Double-check your answers.
6. After the test, conduct an error analysis.
