

SCIENCE STUDY STRATEGIES

S STUDY EVERYDAY

It is more effective to study a little bit every day rather than cram before an exam.

C UMULATIVE

Science is very dense and concepts build over time, so it is important to keep up with the material.

I NTERVALS

Studying at regular times each week will boost knowledge and understanding.

E FFECTIVE ORGANIZATION

Utilize a schedule with regular study times to keep you on track toward achievement.

N OTETAKING

Tailor notes to your needs. Taking notes longhand helps to aid in the retention of your material.

C OLOR

Use color to stimulate learning and help trigger memory.

E VALUATE

Check your knowledge by doing practice problems and quizzing yourself on vocabulary.
